About us

Tech Support of Rosebank takes care of the maintenance and provision of technological support services of the college. The team works on providing solutions to the users' problems, ensuring that the computer system and network are operating correctly, and giving assistance on how to use the digital learning tools.

Organization Name

Rosebank Tech Support

Brief History
Rosebank Tech Support was founded in 2020 to offer specialized technical support services to the students, lecturers, and administrative staff of Rosebank College. This department has been put in place to facilitate the provision of technical assistance to all users regarding any issues they face related to IT. These include problems such as password changes, logging into the students' portal, installing software, internet connection, emails, and computer troubleshooting.
Mission

For providing prompt, efficient, and professional technical support to help students and staff access technology more easily.

Vision

To be the best IT support service in education by offering innovative and customer-oriented technology solutions.

Target Audience

- Current students
- Prospective students
- Lecturers
- Administrative staff

2. Website Goals and Objectives

Goals

- Offer IT support services over the Internet.

- Enable users to request technical support.

- Publish troubleshooting tips and FAQs.

- Enhance communication between users and the IT support team.

Key Performance Indicators (KPIs)

Website uptime of 90%.

- 30% decrease in redundant support queries.

- Response times under 24 hours on average.

- Increased number of support ticket submissions online.

- Excellent customer service feedback scores.

Students can access the college's critical systems.

3. **Current Website Analysis**

Strengths

Students can access the college's critical systems

Information is readily available.

Access via mobile devices.

Weaknesses

- There is no separate Tech Support website for Rosebank.
- Lack of self-service facilities.
- There is no online ticket tracking system.
- Technical information is not easily available.

Areas for Improvement

Provide a dedicated website for Tech Support.
- Include FAQs and troubleshooting manuals.
- Develop an online support ticketing system.
- Make maintenance notices and updates available.

4. Proposed Website Features and Functionality

The website will include:

- Home Page
- About Us
- IT Services
- Submit a Support Ticket
- Knowledge Base
- Frequently Asked Questions (FAQ)
- Contact Us
- System Status
- Announcements

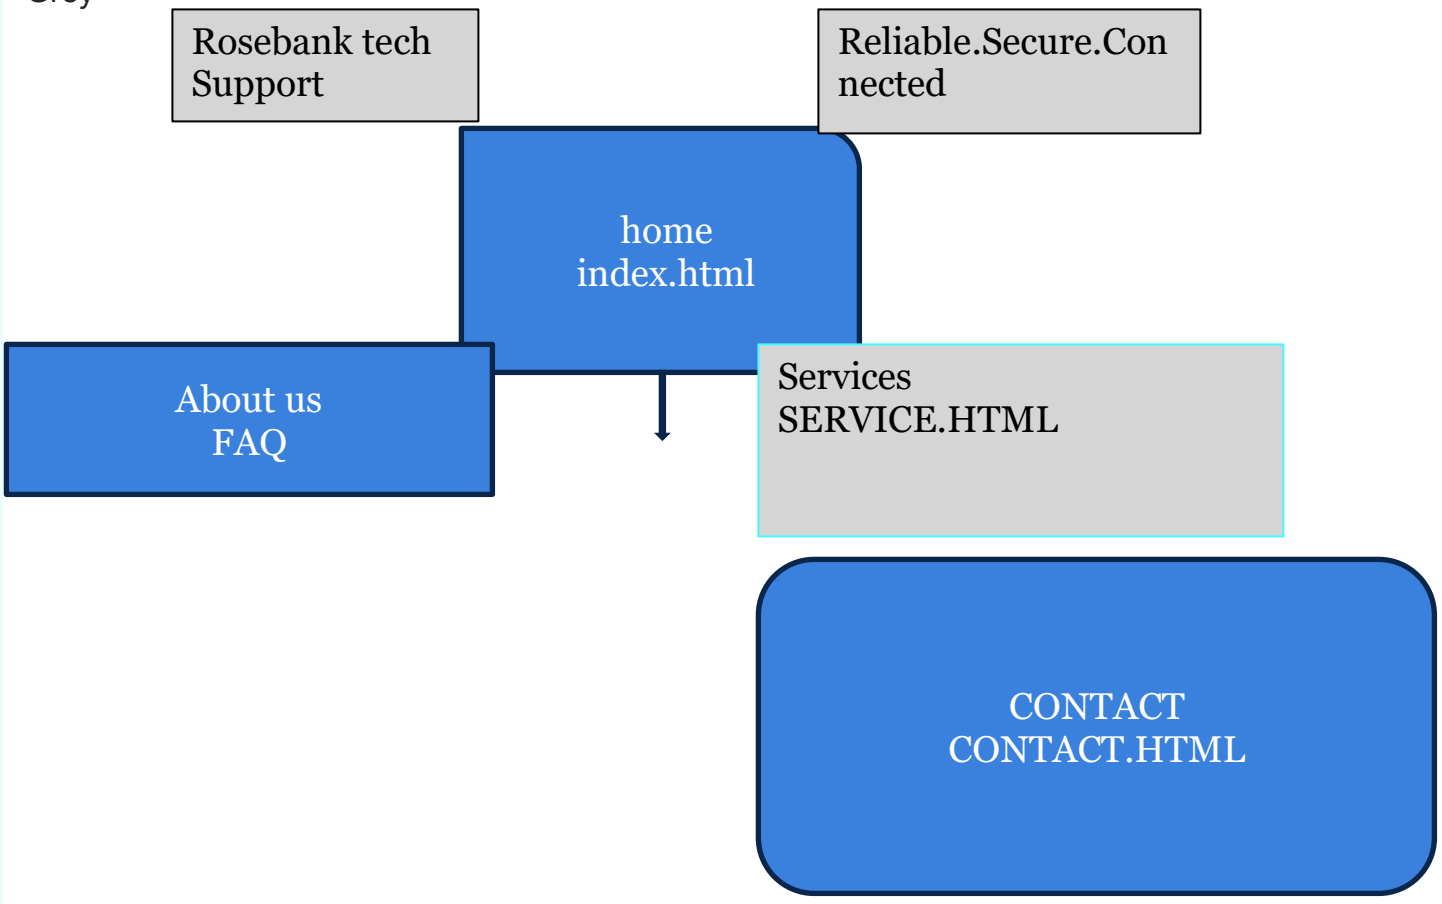

Users will be able to:

- Submit technical support requests.
- Track support tickets.
- Download software and guides.
- Search for solutions to common problems.
- Contact the support team quickly.

5. Design and User Experience

Color Scheme

- Blue
- White
- Grey

Typography

- Headings: Aptos Bold
- Body Text: Aptos Regular

Layout and Design

The website will have a clean, modern, and responsive design with:

- Simple navigation menu
- Search bar
- Quick access buttons
- Mobile-friendly pages
- Consistent branding

User Experience

- Easy navigation
- Fast-loading pages
- Responsive design
- Clear content structure
- Accessible interface
